Dear Sir/Madam,

Sub: - Development of Application Modules for our organization-Reg.,

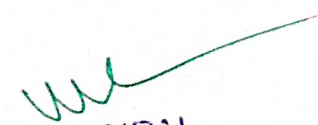

We at YMTS believe in digital transformation of the business. In this modern era entrepreneurs are widely dependent on technology. Our aim is to provide applications which gives full control of the operations handled by an organization.

The main focus of this Petrosoft petrol pump/bunk accounting software package is to supply the petrol pump/bunk owner with the entire perspective of the business. Through this Petrosoft petrol pump/bunk management software the petrol pumps/bunks will have more time to concentrate on enhancement of their business. So we are developing this Petrosoft petrol pump accounting software depending upon the unique requirements of the petrol pump/bunk business rather than preferred simple accounting solutions.

According to our expectation we need to develop software application modules for Sales Master and Tank Master for our Petrosoft petrol pump accounting software. In this regard we require quotation for the development of the above software module using Java. So kindly request you to please send the quotation at the earliest.

Thanking you

Sales Manager
